

shot@life

2024 IMPACT REPORT

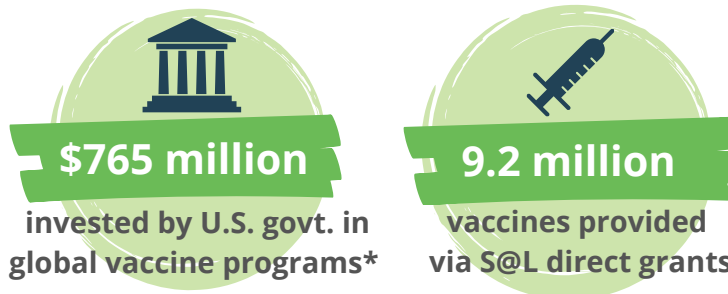

WHO WE ARE

Shot@Life is a global health advocacy campaign of the United Nations Foundation that works to ensure everyone around the world has access to lifesaving vaccines and all children have a shot at life. We rally members of the public, members of Congress, businesses, and civil society partners to support and invest in the global immunization programs of our UN partners.

WHAT WE DID IN 2024

THE RESULTS

Shot@Life gave more of the world's children access to lifesaving vaccines in 2024:

As a result of our **advocacy work**, **congressional appropriators once again approved an FY25 budget that robustly fund global immunization programs.** Because that budget still awaits passage by the full Congress, Shot@Life continues to advocate for it. U.S. investments are vital to reaching the millions of children who lack access to health care and face crises like conflict, displacement, and climate disasters.

Our **direct grants** to UN partners — UNICEF; WHO; UNHCR; and Gavi, the Vaccine Alliance — helped deliver an additional 9.2 million vaccines to children who needed them. **Since the campaign's founding, Shot@Life has helped provide more than 130 million vaccines to children around the world.**

*Based on proposed FY25 subcommittee appropriations bills, subject to final passage.

WHY OUR WORK MATTERS

Giving Refugee Children a Healthy Start

In 2024 we launched *Healthy Start for Refugee Children*, a special initiative of Shot@Life and United to Beat Malaria that, in partnership with the UN Refugee Agency (UNHCR), aims to deliver essential health services to one million refugee and displaced children living in East Africa. The success of this two-year fundraising campaign will not only ensure refugee children receive the health services they urgently need, but also deliver related health education and strengthen healthcare systems so host countries can better meet the needs of displaced families moving forward.

Partner Spotlight:

Get a Shot. Give a Shot.®

Each flu season since 2012, Walgreens matched vaccinations administered at their pharmacies with a donation of a measles or polio vaccine to a child in need. In 2024, the Get a Shot. Give a Shot.® not only reached but exceeded its goal of providing more than 100 million doses of lifesaving vaccines to children around the world. We look forward to working with Walgreens to build on the success of this partnership in years to come.
